When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

1. Fasten universal mounting strap to junction box with junction box screws (by others).
2. Make all electrical connections in accordance to local and national codes.
3. Securely fasten mounting box with lamping assembly to universal mounting strap by installing the assembly over the studs on the mounting strap. Be careful not to pinch the wires.
4. Secure with (2) knurled nuts provided.
5. Snap ball studs, located on back of lens assembly, into ball stud clips, located on the mounting box, by pushing on the center plate. Make sure all (4) studs snap into place. Do not push onto the acrylic lens. Doing so can damage it.

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
