HELLEN 24" DIA CP4410 Shown

Power cord has 4 conductors:

RED = Driver1 (+)
BLACK = Driver1 (-)
YELLOW = Driver2 (-)
WHITE = Driver2 (+)

Note: if only one driver is in the canopy,
the yellow and white 'Driver2' wires
should be capped off.

! When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

Fixture canopy mounting:

1. Fasten mounting plate to junction box with the junction box mounting screws (by others).
2. Make all wire connections per local and national codes.
3. Lift Canopy in place and secure with canopy screws.

Height Adjustment tips:

- Swage on end of support cable holds up weight of fixture through mounting plate.
- Loosen/ tighten strain relief bracket screws to shorten the power cord.
- Support cable and cord enter through same hole in the canopy cover.
- Support cable and power cord can be pushed into the fixture to shorten the suspension height.
